With a stylish new design, the CDE-153EBT provides a multitude of connectivity and control options, plus advanced sound tuning. Play all your favourite music from CD, MP3/WMA/AAC files on USB storage, plus connect and play iPod/iPhone via USB.

What's more, the 3 Preouts enable the unit to be connected to multiple amplifiers to enhance your listening experience. The 9 band parametric EQ and high pass / low pass filters give you maximum control to tune the sound exactly how you like it, while the TuneIt app gives you even more advanced audio tuning options including search and download of preset audio parameters, and Facebook text-to-speech. App direct mode provides access to apps such as Pandora, Tune In Radio and Soundcloud to listen to your favourite tracks.
